

FRANCK Aboya

Full-Stack Engineer | Android & iOS, Flutter & React | Node.js / FastAPI | GCP & Firebase

Email franckaboya99@gmail.com

LinkedIn [mesabo](#)

Github [mesabo](#)

[mesabo.github.io](#)

Full-stack engineer with 5+ years delivering cross-platform mobile apps (Flutter, native Android / iOS) and web frontends (React), backed by Node.js / FastAPI services on GCP and Firebase. Recently shipped CVFlow ([cvflow.app](#)), a production AI resume platform with a 20-language UI and Stripe billing; built AIReco, an AI meeting-assistant; and ships Flutter mobile apps (EKKOU, Babi Gas, OKOHI) with Anohou Solutions. End-to-end ownership across UI, REST / GraphQL APIs, databases, and CI/CD. Available immediately for a full-stack or mobile engineering role to own products from UI to cloud.

KEY ACHIEVEMENTS

- Shipped **CVFlow** ([cvflow.app](#)), a production AI resume platform: 20+ templates, ATS scoring, a **20-language** UI, and Stripe subscriptions.
- Built and launched **EKKOU**, a Flutter mobile app live on the App Store and Google Play, backed by FastAPI services and AI models.
- At D'isum, built iOS / Android sensor apps and a data pipeline connecting **50+ engines and 200+ batteries** to client systems.
- IEEE VTS 2024 Student Paper Award; **2 Q1 journals** and **5 first-author IEEE conference papers** (GLOBECOM, ICC, VTC).

EXPERIENCE

Full-Stack Engineer (Team Leader) / 2025 - Present

CVFlow ([cvflow.app](#)) - Remote (Tokyo, Tunisia, Paris)

- Built the web frontend in Next.js / React / TypeScript / Tailwind, with 20+ resume and 30+ cover-letter templates localized across 20 interface languages.
- Developed a FastAPI backend, containerized with Docker and deployed to GCP Cloud Run via GitHub Actions CI/CD.
- Integrated LLM APIs (Gemini, GPT) to power ATS scoring and AI cover-letter / interview generators in 20 languages.
- Implemented Firebase Auth (Google, LinkedIn), Firestore, and Google Analytics, plus Stripe subscriptions with metered usage.
- Set up Sentry error monitoring and shipped continuously in remote international collaboration.

Next.js React TypeScript FastAPI GCP Firebase
Stripe Docker

Full-Stack & Mobile Engineer / 2025 - 2026

AIReco - Remote

- Owned the entire project independently: prototyping, development, TestFlight deployment with CI/CD, and admin monitoring.
- Developed a Flutter meeting-assistant on a GCP backend: in-app recording, transcription, and AI insights (summary, keywords, translation across 20 languages).
- Integrated an offline model fine-tuned with QLoRA alongside

PROJECTS

SensoryHub — IoT Predictive Maintenance SaaS

Team project, 2026 — Remote

- Architected a cloud-native IoT platform end-to-end: ESP32 sensor-node firmware and Raspberry Pi gateways streaming via MQTT into Python / FastAPI microservices (TimescaleDB, Redis Streams).
- ML anomaly detection (Isolation Forest, XGBoost) served via ONNX, with LLM root-cause analysis (SmolLM2) and RAG on the roadmap.
- React dashboards (admin + management), a sensor-capture app, multi-tenant auth (Keycloak), and Kubernetes / Terraform infrastructure.

Python FastAPI ONNX MQTT
TimescaleDB React Kubernetes

OWNERSHIP

Co-Founder & Full-Stack Lead / 2025 - Present

CVFlow ([cvflow.app](#))

- Co-built a monetized AI resume platform with an international peer; owned product, frontend, and the GCP backend.

Engineering Lead / 2024 - Present

EKKOU Platform (commercial)

- Lead a full-stack AI platform: clients, APIs, GPU model serving, and CI/CD.

cloud LLM APIs (Gemini, GPT).

Flutter GCP QLoRA Gemini GPT ASR

Full-Stack Developer & Sensor Engineer / Oct 2025 - Jul 2026

D'isum Inc. - Tokyo, Japan (Hybrid)

- Developed on-device iOS / Android sensor apps (Swift, Java) for real-time data capture and edge inference.
- Built ETL / data-ingestion services turning raw sensor streams from 50+ engines and 200+ batteries into analytics-ready datasets.
- Designed REST APIs and an integration layer to client systems, with Azure Auth and Azure cloud services, input validation, and error handling.
- Trained and deployed classical ML models for engine sound analysis and battery health monitoring (anomaly and fault detection).
- Maintained and extended SASEye, an existing iOS / Android health-monitoring app for sleep apnea.

Swift Java Python REST Azure ML

Full-Stack Engineer (member) / 2019 - Present

Anohou Solutions (anohou.dev) - Tokyo, Remote

- Shipped and maintained cross-platform Flutter apps across a commercial product suite (EKKOU, Babi Gas, OKOHI), owning each from design to release.
- Designed product proposals, user flows, and UI mockups in Figma, then implemented them as responsive Flutter interfaces.
- Built backend REST APIs in Flask / FastAPI with MySQL data models and Firebase Auth (email, Google) for secure sign-in.
- Engineered Babi Gas, a gas-delivery app, with order placement, delivery tracking, and an operations dashboard for the logistics team.
- Ran data analysis on Babi Gas delivery operations to surface demand patterns and inform dispatch scheduling.
- Delivered features end-to-end in a remote, distributed team, building reusable components shared across the apps.

Flutter Flask FastAPI MySQL Firebase Figma

SOFT SKILLS

End-to-End Ownership, Mentoring, Remote Collaboration, Autonomous, Cross-cultural Teamwork, Versatile, Product Thinking, Communication, Adaptable, Proactive, Resourceful.

EDUCATION

Applied Informatics - 2025 - 2027 (Expected)

PhD, Hosei University - Tokyo
Thesis

Applied Informatics - 2023 - 2025

MSc, Hosei University - Tokyo
Thesis
